

A new service to help you be seen more quickly via your local pharmacist for treatment of minor conditions

We are introducing a new, same-day, GP community pharmacist consultation service to help you receive quality care and support for minor health conditions, more quickly by accessing care from your community pharmacist.

This is for minor illnesses such as: -

- Ankle, foot, knee, lower leg or arm swelling or pain
- Athlete's foot
- Allergic reactions
- Bites or stings
- Coughs and colds
- Eye infections
- Headaches
- Lower back pain
- Mouth ulcers and blisters
- Rashes
- Sore throat
- Shoulder pain

How does the new service work?

[Click here to watch a video](#) that explains how this new service works

Now, when you contact us regarding a minor condition, after discussing your condition, where appropriate, our receptionist will offer you the option of having a same-day appointment with your community pharmacist.

Community pharmacists are highly qualified and experienced in providing clinical advice and care (including recommending over the counter treatments) for minor illnesses and conditions. They will offer you a same-day consultation via the phone, or in person, which can be arranged quickly and at a time to suit you.

Your pharmacist will take your medical history, ask about your symptoms and any current medication you might be taking. Following the consultation, the pharmacist will offer you self-care advice and if appropriate, offer you an over-the-counter product. The pharmacist will make a record of the outcome of your consultation and send it to your GP.

If having given you advice/treatment, your pharmacist identifies you need further specialist help your pharmacist, will be able to refer you back to your GP, or onto another health service for support.

Community pharmacists have already successfully seen thousands of patients for a consultation for a minor condition, following a call to NHS 111 and through GPs around the country who have been piloting this service

Evidence from these pilots shows advice provided by community pharmacists results in the same outcome, as if the patient went to see their GP, or attended an emergency department.

Advantages for patients using the new GP Community Pharmacist consultation service

- Community pharmacies are local, open longer hours than the GP practices and can offer you the same consultation outcome at a time that is more convenient for you either on the phone, in person or through a video consultation
- If the pharmacist thinks you need to see the GP or other health professional, they can help arrange an urgent appointment for you.
- This will help ensure as patients you receive the right care, in the right place, with the right person and at the right time.
- Introducing this new service, frees up GP appointments for those people with more complex symptoms who really need to see a GP.
